- Corn, soybean and wheat check-off updates

Sponsored by:
Agriculture and Agribusiness Institute
Dept. of Plant, Soil and Microbial Sciences
MSU Extension Field Crops Team
2018 INTEGRATED CROP AND PEST MANAGEMENT UPDATE FOR AGRIBUSINESS

For Agri-business, Pesticide Dealers, Crop Consultants, Extension Educators and Farmers

This crop management Extension update is for Agri-businesses, Pesticide Sales and Service Professionals, Crop Consultants, and farmers. We will look back at the 2018 crop season and drought and discuss the upcoming 2019 recommendations for weed, insect, and diseases. Farmers needing pesticide re-certification credits before the end of year could earn MDA and CCA credits.

With grain prices declining and production costs rising, it is important that farmers and agri-business professionals consider all production management options and remain up-to-date on the latest MSU recommendations.

At this meeting, you will receive up-to-date information on 2019 MSU pest control recommendations and options. This event will enable you to make year-end pesticide sales and purchasing decisions for the upcoming cropping season. MSU Extension specialists will be present to answer your questions.

The program will be held on Tuesday December 18, 2018 at the MSU Pavilion. The cost of the program is $60 per person, which includes refreshments, lunch, 2019 MSU Weed Control Guide for Field Crops (E-434), and other Extension bulletins.

MORNING SESSION  9:00 AM – 12 Noon

FEATURED TOPICS
